

主旨: 集思廣益

This is rubbish public questionnaire.

What is the department duty?

You should determine a well develop human policy and direction , but seems the gov would like to pass the duty and" ball" to public.

If the situation get worse, you can blame the result from public and group decision.

Despite you have to establish a publish questionnaire, you have to give a direction clearly to public. I have no idea what is the meaning from the poster.

This government is really disappointed and scare to bear the final decision.

Thank you

Regards
Mr Wang
