

主旨: Comments

Dear Sir/Madam,
I am writing in with more comments.

I am reminded by Franklin Lam, formerly of the Government, that we have to take an active and positive role for the future.

I would thus suggest that the suggestions of his think tank, HK Golden 50 be seriously considered.

Furthermore, considering the Financial Secretary's view that the financial reserves will eventually be depleted, it is all the more important that they be used properly and in an active/positive manner.

Make the cake bigger. Don't rest on one's laurels and simply 'scrooge' the money. Use it to make HK a better place so that more people will come to live here and more people will have children here. Holding such a massive amount of money and receiving a measly amount of interest from buying US Treasury bonds and equities will not make HK a better place. Build infrastructure and malls/exhibition centres to cater for PRC tourists and other tourists from around the world. Improve and build hospitals for the elderly. This will create jobs and wealth. Advertise HK for medical services to obtain medical tourism.

There is so much that can be done. Don't rest on our laurels.

The HK government in having such a consultation is a positive move. But don't sit back after the consultation. Take action so that our children, grandchildren and descendants can have a wonderful home.

Best regards,
Mr. KH Chan.
